

Sprint Triathlon Program

24-Week Training Program

Program Overview

Comprehensive 24-week sprint triathlon program for beginners and intermediate athletes.

Training Phases

Phase	Weeks	Focus	Intensity
Base Building	1-4	Aerobic fitness	Moderate
Build Phase	5-8	Strength & endurance	High
Peak Phase	9-24	Race preparation	Very High

Nutrition Guidelines

Maintain proper hydration and nutrition throughout training. Consume carbohydrates before long sessions and protein after workouts for recovery.

Injury Prevention

Always warm up before training and cool down after. Include flexibility work and strength training 2-3 times per week.
